SKILLS

Technical Skills	HTML, CSS, JavaScript, jQuery, React, Redux, Tailwind, Bootstrap, REST APIs
Tools	Git(Version Control), Visual Studio Code, BrowserStack, GitLab, Postman
Soft Skills	Team Collaboration, Excellent Communication, Problem Solving

EXPERIENCE

Frontend Developer Ogrelogic Solutions Pvt. Ltd.	October 2022 - Present <i>Sector-63, Noida</i>
--	---

- Built and maintained responsive web applications using React.js, ES6+ JavaScript, HTML5, and CSS3.
- Developed reusable and maintainable user interface components using React hooks, Context API, and Redux for state management.
- Integrated REST APIs using Axios and the Fetch API, handling async data loading, error states, and loading indicators.
- Followed a component-based architecture and implemented custom hooks to abstract business logic and improve reusability.
- React Router was used for efficient client-side routing, route protection, and nested navigation.
- Designed responsive layouts using Tailwind CSS, Bootstrap, or SASS, ensuring cross-device compatibility.
- Optimized performance through lazy loading, React.memo, useMemo, and code splitting via React.lazy() and Suspense.
- Worked with design teams to convert Figma/Adobe XD designs into pixel-perfect, accessible, and user-friendly UIs.
- Ensured browser compatibility and optimized page speed using Chrome DevTools, Lighthouse.
- Wrote unit tests using Jest and the React testing library to ensure component reliability and regression coverage.
- Maintained clean, well-documented code with focus on scalability, performance, and readability.
- Performed testing and debugging to maintain seamless performance across all browsers and devices.

FEATURED PROJECT

NetStream Tech Stack: React.js, Firebase Auth, Redux, TMDB API, OpenAI API, React Router, Custom Hooks

- Developed a high-fidelity Netflix clone with responsive UI and seamless user experience.
- Implemented Firebase Authentication, enabling user sign-up/login with email-password and Google OAuth.
- Integrated OpenAI API to build a smart movie recommendation system.
- Used Redux to efficiently manage the application-wide state for user sessions, movie data, and UI controls.
- Built custom React hooks to dynamically fetch and categorize movies/series from the TMDB API.
- Structured app with modular, reusable components to ensure clean, maintainable code.

Master Chef – Food Delivery Web App (React, Redux, Jest)

- Built a dynamic restaurant discovery platform where clicking on a restaurant card navigates to a detailed restaurant page using dynamic routing.
- Implemented categorized menu display (e.g., Recommended, Best Selling) fetched from a live API.
- Developed a fully functional Cart System using Redux, allowing users to add, remove, and clear items seamlessly.
- Achieved 95% test coverage using Jest and React Testing Library to ensure component reliability and application stability.
- Structured app with modular, reusable components to ensure clean, maintainable code.

EDUCATION

Bachelor of Computer Science, Modi Institute of Technology, Kota
CGPA: 8.67

2019 - 2023
